

elemelt®

ELEMELT PU595

A reactive polyurethane hot melt adhesive

FEATURES & BENEFITS

- High green strength
- Excellent bond strength
- High heat resistance
- UV tracer for visibility when processing
- Fast Cure
- Lower off-gassing
- Adhesion to various substrates
- High creep resistance

SUGGESTED USES

Automotive interiors, sandwich panels, product assembly, office furniture, woodworking foils, and films.

TECHNICAL DATA	
Type	Moisture Cure Hot Melt
Appearance	White to Transparent
Solids	100%
Specific Gravity	9.1lb / gal
Application Temperature	240-300 ° F
Viscosity	13,000 – 18,000cps @ 250 °F
Storage Stability	Store in a cool, dry place
