#### **1** Identification

#### · Product identifier

#### · Trade name: EP1287 B

Application of the substance / the mixture Epoxy Hardener

# Details of the supplier of the safety data sheet Manufacturer/Supplier: ResinLab, LLC N109 W13300 Ellsworth Drive Corrections WI 52002

Germantown, WI 53022 1-877-259-1669

www.resinlab.com

Information Department: Product Safety Department: msds@resinlab.com Emergency Telephone Number: North America - Chemtrec: 1-800-424-9300 (24 hours) International - Chemtrec: 01-703-527-3887 (24 hours)

#### 2 Hazard(s) identification

#### · Classification of the substance or mixture

Acute Tox. 4 H332 Harmful if inhaled.

- Skin Corr. 1A H314 Causes severe skin burns and eye damage.
- Skin Sens. 1 H317 May cause an allergic skin reaction.
- H361 Suspected of damaging fertility or the unborn child. Repr. 2
- · Label elements
  - GHS label elements The product is classified and labeled according to the Globally Harmonized System (GHS). Hazard pictograms

GHS05 GHS07

#### · Signal word Danger

• Hazard-determining components of labeling: Fatty acids, tall-oil, reaction products with tetraethylenepentamine Bisphenol A Benzyl alcohol N-(2-Aminoethyl)piperazine Triethylenetetramine Triethylenetetrámine Hazard statements H332 Harmful if inhaled. H314 Causes severe skin burns and eye damage. H317 May cause an allergic skin reaction. H361 Suspected of damaging fertility or the unborn child. **Precautionary statements** Do not handle until all safety precautions have been read and understood. Do not breathe dust/fume/gas/mist/vapors/spray. Wash thoroughly after handling. Use only outdoors or in a well-ventilated area. Contaminated work clothing must not be allowed out of the workplace. Avoid release to the environment. Wear protective gloves/protective clothing/eye protection/face protection. Avoid release to the environment. Wear protective gloves/protective clothing/eye protection/face protection. In case of inadequate ventilation wear respiratory protection. If swallowed: Rinse mouth. Do NOT induce vomiting. If on skin (or hair): Take off immediately all contaminated clothing. Rinse skin with water/shower. If inhaled: If breathing is difficult, remove person to fresh air and keep comfortable for breathing. If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Get medical advice/attention if you feel unwell. If skin irritation or rash occurs: Get medical advice/attention. If experiencing respiratory symptoms: Call a POISON CENTER/doctor. Wash contaminated clothing before reuse. Collect spillage. Store locked up. Dispose of contents/container in accordance with local/regional/national/international regulations. · Additional information: 12.6 % of the mixture consists of component(s) of unknown toxicity. Classification system: NFPA System NFPA ratings (scale 0 - 4) Health = 3Fire = 1 Reactivity = 0NFPA special hazards (water reactivity and oxidizing property): None

#### 4 First-aid measures

#### Description of first aid measures

General information:

- Keep warm, position comfortably and cover well. Immediately remove any clothing soiled by the product.
- After inhalation:

Supply fresh air and if symptoms occur call for a doctor. In case of unconsciousness place patient stably in side position for transportation.

(Contd. on page 3)

Page 3/10

## Safety Data Sheet acc. to OSHA HCS

Reviewed on 06/01/2017

#### Printing date 06/01/2017 Trade name: EP1287 B

(Contd. of page 2)

- After skin contact: Wash skin immediately with soap and water. Remove all contaminated clothing and shoes, continue to rinse skin for 10 minutes. Clean shoes before reuse.
- Seek medical advice. After eye contact:
- Rinse opened eye for 10-15 minutes under running water. Then consult a doctor.
- Remove contact lenses if present and easy to do so; continue rinsing. Do not put any ointments, oils or medication in eyes without specific instructions. Get medical attention.

- After swallowing: If victim is unconscious; never give anything by mouth. If victim is conscious rinse mouth and give small amounts of water.
- Do NOT induce vomiting. Seek immediate medical advice.

If vomiting occurs spontaneously, keep victim's head below hips to prevent aspiration of liquid into lungs.

#### After Exposure

Move to fresh air at once

- Get medical advice/attention. Information for doctor: Most important symptoms and effects, both acute and delayed No further relevant information available. Indication of any immediate medical attention and special treatment needed Check section 11 Toxicological Information for further relevant information.

#### 5 Fire-fighting measures

- Extinguishing media Suitable extinguishing agents: Water spray
- - Alcohol'resistant foam
  - Fire-extinguishing powder Carbon dioxide

Carbon dioxide water fog Use fire fighting measures that suit the environment. • For safety reasons unsuitable extinguishing agents: Water with full jet Special hazards arising from the substance or mixture In case of fire, the following can be released: Nitrogen oxides (NOx) Hydrogen chloride (HCl) May generate ammonia gas. Carbon dioxide (CO<sub>2</sub>) and Carbon monoxide (CO) Formaldehyde, a skin and lung sensitizer and a regulated carcinogen, may be formed during fires. Advice for firefighters • Protective equipment:

- **Protective equipment:** Mouth respiratory protective device. If employees are expected to fight fires, they must be trained and equipped as stated in the OSHA fire brigades standard (29 CFR
- 1910 156)
- As with any fire, wear positive-pressure self-contained breathing apparatus and full protective gear that are NIOSH approved.

#### 6 Accidental release measures

- Personal precautions, protective equipment and emergency procedures
- Wear protective clothing. Wear protective equipment. Keep unprotected persons away.

Do not breathe gas, vapors, dusts or mists if their inhalable particles occur during use. **Environmental precautions:** Do not allow product to reach sewage system or any water course. Inform respective authorities in case of seepage into water course or sewage system.

- Methods and material for containment and cleaning up:
   For large spills: provide diking or containment to minimize spreading. If possible pump and store material in appropriate container. For small spills: Ventilate and wash area. Collect spills and absorbant material in appropriate container. Ensure adequate ventilation.
   Allow molten product to cool.
   Absorb with liquid-binding material (sand, diatomite, acid binders, universal binders, sawdust).
   Use neutralizing agent if necessary.
   Dispose contaminated material as waste according to item 13.

#### 7 Handling and storage

#### Handling:

- Precautions for safe handling Do not breathe dust created by cutting, sanding, grinding or machining. Avoid breathing vapor or spray mists. Ensure good ventilation/exhaustion at the workplace. Prevent formation of aerosols.

- Keep away from incompatible material(s). Avoid any release into the environment. For industrial or professional use only Do not breathe dust/fumes/mist/vapor/spray. Avoid contact with eyes, skin and clothing. Keep away from heat,sparks, flames and ignition sources.

US ACGIH	Short-term value: 10 mg/m <sup>3</sup>
	ethylenetetramine
WEEL	Long-term value: 6 mg/m³, 1 ppm Skin
75-28-5 isol	putane
TLV	Short-term value: 2370 mg/m³, 1000 ppm (EX)

· Additional Occupational Exposure Limit Values for possible hazards during processing: None.

Additional Occupational Exposite Limit Laborate Limit Laborate Limit Laborate Limit Laborate Labo

#### Personal Protective Equipment (PPE)

• Breathing equipment: Sufficient ventilation in pattern and volume should be provided in order to maintain air contaminant levels below recommended exposure limits.

Use a NIOSH approved air-purifying organic vapor respirator if occupational limits are exceeded. For emergency situations, confined space use, or other conditions where exposure limits may be greatly exceeded, use an approved air supplied respirator. Observe OSHA regulations (29CFR 1910.134) for respirator use.

Protection of hands:

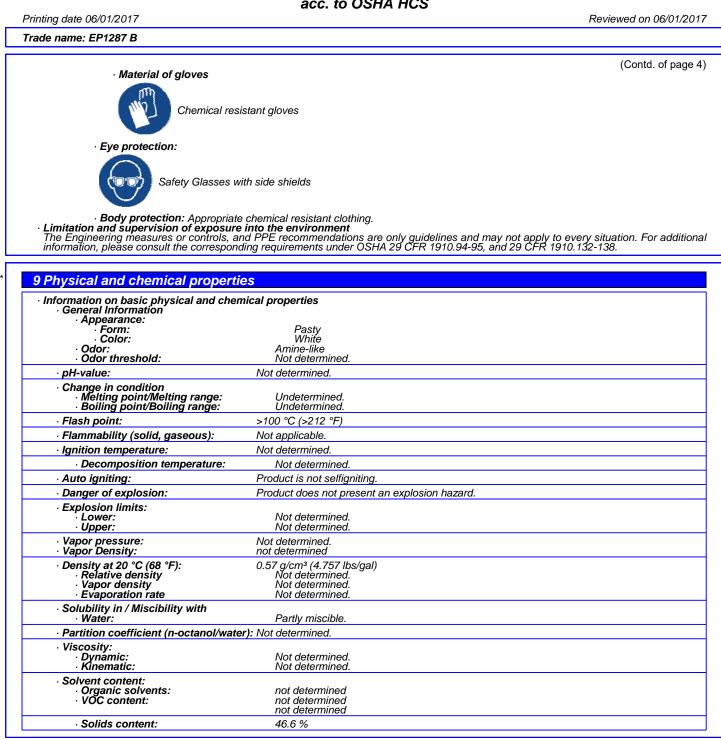

The glove material has to be impermeable and resistant to the product/ the substance/ the preparation. Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation

(Contd. on page 5)

Safety Data Sheet acc. to OSHA HCS

Page 5/10

#### 10 Stability and reactivity

· Reactivity Not a regulated physical hazard under GHS.

- Hazardous Reactivity and Chemical Stability Stable under normal conditions of use, storage and temperatures. Thermal decomposition / conditions to be avoided: To avoid thermal decomposition do not overheat.
- No decomposition if use'd and stored according to specifications.
- Possibility of hazardous reactions Exothermic polymerization.
   Conditions to avoid Keep away from heat, sparks, flame and any other ignition sources.

Incompatible materials:

Oxidizing agents
