H227 Combustible liquid. H315 Causes skin irritation. H319 Causes serious eye irritation. H335 May cause respiratory irritation.

Precautionary statements

Precautionary statements Keep away from flames and hot surfaces. – No smoking. Avoid breathing dust/fume/gas/mist/vapors/spray Wear protective gloves/protective clothing/eye protection/face protection. Wash thoroughly after handling. Use only outdoors or in a well-ventilated area. If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. IF INFALED: Remove person to fresh air and keep comfortable for breathing. Call a POISON CENTER/doctor if you feel unwell. If skin irritation occurs: Get medical advice/attention. IF ON SKIN: Wash with plenty of water. Take off contaminated clothing and wash it before reuse. Store in a well-ventilated place. Keep container tightly closed. Dispose of contents/container in accordance with local/regional/national/international regulations.

(Contd. of page 2) Do not breathe gas, vapors, dusts or mists if their inhalable particles occur during use. Ensure personnel take precautions for their personal protection during clean up; see Section 8 for the specific requirements. • Environmental Precautions No further relevant information. Cleaning Up Methods Eliminate heat, sparks, open flame and other ignition sources before clean up. A vapor suppressing foam should be used to reduce vapors at first. All equipment used for clean up must be grounded. Don't touch or walk through spilled chemicals unless trained and equipped as stated in the OSHA fire brigades standard (29 CFR 1910.156). Ensure adequate ventilation. Keep unauthorized personnel away. Absorb residues with liquid-binding materials. Ventilate and wash area after clean-up is complete. Collect spills in suitable and properly labeled containers. Do not use solvents unless following safe handling practices and within the recommended exposure guidelines. Dispose contaminated chemicals as waste according to Section 13. **Cleaning Up Methods** 7 Handling and storage Handling **Precautions for Safe Handling** Caution! Combustible liquid; keep away from direct sunlight, heat, sparks, flame and other ignition sources during handling. Ensure good ventilation and/or exhaustion at workplace. Keep away from incompatible material(s). Avoid any release into the environment. Avoid any release into the environment. Keep container tightly closed when not in use if product is volatile so as to generate hazardous atmosphere. Observe all the personal protection requirements in Section 8. **Information about Protection Against Explosions and Fires** Keep away from heat, sparks, open flame and other ignition sources. Protect against electrostatic charges during handling. Metal containers involved must be grounded and bonded. Use only non-sparking tools and equipment, especially when opening or closing containers of combustible contents. Storage Requirements to be Met by Storerooms and Receptacles Caution! Combustible liquid; keep away from direct sunlight, heat, sparks, flame and other ignition sources during storage. Store in tightly closed containers in a cool, and well-ventilated area. Store in a well-ventilated place; provide ventilation for receptacles. Keep stored in accordance with local, regional, national, and international regulations. Information about Storage in One Common Storage Facility Store away from incompatible material(s). Store away from foodstuffs. Avoid roose to the opvirgement. Avoid release to the environment. · Additional Information No further relevant information. 8 Exposure controls/personal protection Engineering Measures or Controls Exposure Limit Values that Require Monitoring at the Workplace 7085-85-0 Ethyl 2-cyanoacrylate TLV Long-term value: 1 mg/m³, 0.2 ppm Ventilation rates should be matched to conditions. If applicable, use process enclosure(s), local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. Other Engineering Measures or Controls · Personal Protective General Protective and Hygienic Measures Avoid any contact with eye. Do not eat, drink or smoke during work. Clean hands and exposed skin thoroughly after work and before breaks.

Personal Protective Equipment (PPE)

Breathing Equipment

Sufficient ventilation in pattern and volume should be provided in order to maintain air contaminant levels below recommended exposure limits.

Use a NIOSH approved air-purifying organic vapor respirator if occupational limits are exceeded. For emergency situations, confined space use, or other conditions where exposure limits may be greatly exceeded, use an approved air supplied respirator. Observe OSHA regulations (29CFR 1910.134) for respirator use. Hand Protection

Selection of glove material should take into consideration the penetration times, rates of diffusion, and the degradation. Suggested glove type(s):

Nitrile Gloves Butyl Rubber Gloves

By Protection safety glasses with side shields and or face shield. Body Protection Chemical resistant apron; cover exposed skin.

Additional Information

All protective clothing (suits, gloves, footwear, headgear) should be clean, available every day, and put on before work.

Hazardous Reactivity and Chemication inquire
 Hazardous Reactivity and Chemication inquire
 Hazardous Reactivity and Chemication inquire
 May form explosive vapor-air mixtures when heated above the flash point.
 May decompose, condense, or self-react under conditions of high temperature and/or pressure; but there is little or no potential for heat generation or explosion, or readily undergo hazardous polymerization in the absence of inhibitors.

· Thermal Decomposition and Conditions to be Avoided

Keep away from incompatible material(s). Thermally decomposes during fire or high heat; keep away from heat, sparks, open flame and other ignition sources.

- · Possibility of Other Hazardous Reaction(s) May polymerize in contact with water or moisture.
- · Incompatible Material(s) Amines. water Alcohols soil

Oxidizing agents Strong bases

Hazardous Decomposition Product(s) Thermally decomposes during fire or very high heat. See Section 5 for fire hazards evolved during thermal decomposition.

Toxicological information
· Acute Toxicity
· Oral
7085-85-0 Ethyl 2-cyanoacrylate
Oral LD50 > 5000 mg/kg (rat) (OECD TG 401; males; neat substance) One out of six rats died on the fourth day at 5000 mg/kg dose level; the substance was not classified as toxic to rats based o the classification criteria. Reference: ECHA (2012).
 Potential Health Effect(s): See acute inhalative effect(s) for further information
· Dermal
7085-85-0 Ethyl 2-cyanoacrylate
Dermal LD50 > 2000 mg/kg (rabbit) (LD0; OECD TG 402; males; neat substance) No mortality occurred; the substance was therefore considered as non-toxic via dermal application. Reference: ECHA (2012).
Potential Health Effect(s):
No further relevant information available; classification is not possible. See acute inhalative effect(s) for further information.
