Subject: Substances of Very High Concern Inquiry (REACH SVHC)

Dear Customer,

A list of chemicals being considered as candidates for SVHC classification under the European REACH regulations has been posted by the European Chemicals Agency (ECHA) and can be found at: <https://echa.europa.eu/candidate-list-table>. Currently there are 241 substances on the REACH Candidate List which was last updated on 27.06.2024.

The main means of communication for Dow products is our EU Safety Data Sheet (SDS), in section 3 and 15 the relevant information is listed. To the extent contained in the product the new SVHC was already mentioned in section 3 due to its classification prior to the announcement on 27.06.2024.

If a SVHC component is not shown, this means a SVHC component is not expected to be present in the product above the reporting threshold of 0.1 wt%. Please find the majority of our SDS via the link to our SDS Finder for selfservice: [SDS Finder - Dow Safety Data Sheets | Dow Inc.](#) In case you cannot locate it please let us know at [Literature Request | Dow Inc.](#)

For your additional questions, please don't hesitate to contact Dow at [Customer Support | Dow Inc.](#) and we will do our best to assist you.

Sincerely,

Dow Silicones REACH Team

Dow Silicones Products Containing Substances on the REACH Candidate List (SVHC)

The table below covers all Dow Silicones' commercial products that contain a chemical substance included in the REACH Candidate list at a concentration of 0.1% w/w or above **except D4/D5/D6** for which a separate communication will be made to our direct customers on demand. The table is reviewed and updated following each update of the Candidate List by ECHA. For products sold in the EU containing a SVHC at $\geq 0.1\%$, the substance will be listed in Section 3 of our EU Safety Data Sheet.
