Print Date 06/05/2015

Product Identifier

· Trade Name: CA6007

Application of the Substance or Mixture: Cyanoacrylate Adhesive

• Details of the Supplier of the Safety Data Sheet (SDS)

Manufacturer or Supplier: Resinlab, LLC N109 W13300 Ellsworth Drive, Germantown, WI 53022 1-800-388-8605 www.resinlab.com

· Information Department: Product Safety Department: msds@resinlab.com · Emergency Telephone Number:

North America - Chemtrec: 1-800-424-9300 (24 hours) International - Chemtrec: 01-703-527-3887 (24 hours)

2 Hazard(s) identification

• Hazard Classification

Skin Irrit. 2 H315 Causes skin irritation. Eye Irrit. 2A H319 Causes serious eye irritation. STOT SE 3 H335 May cause respiratory irritation.

Flam. Liq. 4 H227 Combustible liquid.

· Label Elements

• GHS label elements The product is classified and labeled according to the Globally Harmonized System (GHS). • Pictogram(s)

· Signal Word Warning

- Hazard-determining Component(s) Ethyl 2-cyanoacrylate
- Hazard statements

Combustible liquid. Causes skin irritation. Causes serious eye irritation. May cause respiratory irritation.

Precautionary statements

Keep away from heat/sparks/open flames/hot surfaces. - No smoking. Avoid breathing dust/mist/vapors/spray Wear protective gloves/protective clothing/eye protection/face protection. Use only outdoors or in a well-ventilated area. Store in a cool and well ventilated place. If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing. Call a poison center/doctor if you feel unwell. If skin irritation occurs: Get medical advice/attention. If eye irritation persists: Get medical advice/attention. In case of fire: Use for extinction: dry sand, dry chemical or alcohol resistant foam. If on skin: Wash with plenty of soap and water. Take off contaminated clothing and wash it before reuse. Dispose of contents/container to an approved waste disposal plant. (Contd. on page 2)

3 Composition/information on ingredients

[•] Chemical Characterization: Mixtures

Composition/Information on IngredientsCAS: 7085-85-0Ethyl 2-cyanoacrylateEINECS: 230-391-5Skin Irrit. 2, H315; Eye Irrit. 2, H319; STOT SE 3, H335Index Number: 607-236-00-9Flam. Liq. 4, H227RTECS: UD3330050Flam. Liq. 4, H227

Classification System:

The Classifications were based on the Toxicological and Ecological Data of the substances/mixtures in the Section 11 and 12.

4 First-aid measures

Description of First Aid Measures

[•] General Information

Ensure medical personnel are aware of exposure and take precautions for their personal protection; see Section 8 for the information of personal protection.

After Inhalation

Remove victim from exposure to fresh air. Keep person at rest. Provide oxygen if person is not breathing. In case of unconsciousness place patient stably in side position for transportation. Seek immediate medical advice.

[•] After Skin Contact

Remove all contaminated clothing and wash before reuse. Wash contaminated skin with water and soap and rinse thoroughly. Seek immediate medical advice.

After Eye Contact

Immediately bathe eyes for 15 minutes under running water. Immediately remove contact lenses if present. Continue rinsing. Seek immediate medical advice.

• After Swallowing

If victim is unconscious; never give anything by mouth.

acc. to OSHA HCS

Page 3/11

Revision Date 06/05/2015

Print Date 06/05/2015

Trade Name: CA6007

(Contd. of page 2)

If victim is conscious; rinse out mouth and give victim small amounts of water. Seek medical treatment in case of complaints.

• After Exposure Seek medical treatment in case of complaints.

Information for Doctor Have chemical containers, labels and/or (M)SDS ready when calling or visiting a medical center. Indication of any Immediate Medical Attention and Special Treatment Needed

After frequent or high intense exposure, the following medical tests are recommended:

eye tests skin tests

respiratory system tests

Check section 11 Toxicological Information for further relevant information.

Additional Information

For additional information, please consult the corresponding first aid measures in the most current version of Emergency Response Guidebook which is produced by the US Department of Transportation.

5 Fire-fighting measures

Extinguishing Media

Suitable Extinguishing Agent(s)

Use fire fighting measures and extinguishing agents that suit the environment. In case of fire, suitable extinguishing agents are: Dry sand Alcohol resistant foam.

Dry chemical or fire-extinguishing powder.

· Unsuitable Extinguishing Agent(s) No relevant information.

· Firefighting Procedures

Isolate fire and deny unnecessary entry. Eliminate all ignition sources if safe to do so. Do not extinguish fire unless flow can be stopped. Fight fire remotely due to the risk of explosion. Burning liquids may be moved by flushing with water; protect personnel and minimize property damage. Fight fire from protected location or safe distance. Contain fire water runoff if possible to prevent environmental pollution.

Special Hazards Arising in Fire

In case of fire, following can be released: Carbon dioxide (CO_2) and Carbon monoxide (CO) Nitrogen oxides

Advice for Firefighters

If employees are expected to fight fires, they must be trained and equipped as stated in the OSHA fire brigades standard (29 CFR 1910.156).

As with any fire, wear positive-pressure self-contained breathing apparatus and full protective gear that are NIOSH approved.

· Additional Information Ensure adequate and functional fire fighting facilities equipped in working area at all times.

6 Accidental release measures

Personal Precautions

Do not breathe gas, vapors, dusts or mists if their inhalable particles occur during use. Ensure personnel take precautions for their personal protection during clean up; see Section 8 for the specific requirements.

· Environmental Precautions No further relevant information.

Cleaning Up Methods

Ensure adequate ventilation. Eliminate all ignition sources. Keep unauthorized personnel away. For large spills: Shut off source of leak if safe to do so.

(Contd. on page 4)

(Contd. of page 3)

Dike and contain.

Remove with vacuum trucks or pump to storage/salvage vessels. Flood area to polymerize material then soak up with an inert absorbant. Absorb residues with liquid-binding materials.

For small spills:

Ventilate and wash area after clean-up is complete.

Collect spills in suitable and properly labeled containers.

Do not use solvents unless following safe handling practices and within the recommended exposure guidelines. Dispose contaminated chemicals as waste according to Section 13.

Additional Information No further relevant information.

7 Handling and storage

· Handling

Precautions for Safe Handling

Obtain special instruction before use; do not handle until all safety precautions have been read and understood. Do not breathe gas, vapors, dusts or mists if their inhalable particles occur during handling.

Ensure good ventilation and/or exhaustion at workplace.

Keep away from incompatible material(s).

Avoid any release into the environment.

Keep container tightly closed when not in use if product is volatile so as to generate hazardous atmosphere.

Observe all the personal protection requirements in Section 8.

[•] Information about Protection Against Explosions and Fires

Keep away from heat, sparks, open flame and other ignition sources during handling.

[.] Storage

Requirements to be Met by Storerooms and Receptacles

Store in a well-ventilated place; provide ventilation for receptacles.

Keep stored in accordance with local, regional, national, and international regulations.

Information about Storage in One Common Storage Facility

Store away from incompatible material(s). Store away from foodstuffs. Avoid release to the environment.

· Additional Information No further relevant information.

8 Exposure controls/personal protection

[•] Engineering Measures or Controls

Exposure Limit Values that Require Monitoring at the Workplace

7085-85-0 Ethyl 2-cyanoacrylate

TLV Long-term value: 1 mg/m³, 0.2 ppm

Other Engineering Measures or Controls

Ventilation rates should be matched to conditions.

If applicable, use process enclosure(s), local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits.

Personal Protective

General Protective and Hygienic Measures

Avoid any contact with eye.

Do not eat, drink or smoke during work.

Keep food, drink or feed away from working area.

Contaminated work clothing is not allowed out of workplace. Clean hands and exposed skin thoroughly after work and before breaks.

Personal Protective Equipment (PPE)

Breathing Equipment

Caution! Improper use of respirators is dangerous.

· Dynamic: · Kinematic: Not determined. Not determined.

· Additional Information

No further relevant information.

10 Stability and reactivity

· Physical Hazard(s) Not a regulated reactive or physical hazard under GHS.

Hazardous Reactivity and Chemical Stability

May form explosive vapor-air mixtures when heated above the flash point. May decompose, condense, or self-react under conditions of high temperature and/or pressure; but there is little or no potential for heat generation or explosion, or readily undergo hazardous polymerization in the absence of inhibitors.

Thermal Decomposition and Conditions to be Avoided

Keep away from incompatible material(s).

Thermally decomposes during fire or high heat; keep away from heat, sparks, open flame and other ignition sources.

• Possibility of Other Hazardous Reaction(s) May polymerize in contact with water or moisture.

• Incompatible Material(s) Amines. Water Oxidizing agents Strong bases

Hazardous Decomposition Product(s)

Thermally decomposes during fire or very high heat. See Section 5 for fire hazards evolved during thermal decomposition.

• Hazardous Polymerization Product(s) No relevant information.

· Additional Information No further relevant information.

11 Toxicological information

• Acute Toxicity

Oral T085-85-0 Ethyl 2-cyanoacrylate Oral LD50 > 5000 mg/kg (rat) (OECD TG 401; males; neat substance) One out of six rats died on the fourth day at 5000 mg/kg dose level; the substance was not classified as toxic to rats based on the classification criteria. Reference: ECHA (2012). Potential Health Effect(s): See acute inhalative effect(s) for further information

· Dermal 7085-85-0 Ethyl 2-cyanoacrylate

1065-65-0 Ethyl 2-Cyanoacrylate	
Dermal LD50 > 2000 mg/kg (rabbit) (LD0; OECD TG 402; males; neat substance)	
No mortality occurred; the substance was therefore considered as non-toxic via dermal application.	
Reference: ECHA (2012).	
· Potential Health Effect(s):	
No further relevant information available; classification is not possible.	
See acute inhalative effect(s) for further information.	
[·] Inhalative

Trade Name: CA6007

Generation of waste should be avoided or minimized wherever possible.

Chemical waste, even small quantities, is neither allowed to be poured down drains, sewage system or waterways; nor disposed with household garbage.

Dispose of contents/containers in accordance with local, regional, national, and international regulations.

[•] Unused and Uncontaminated Packagings

• **Recommendation** Dispose of according to your local waste regulations.
